Vinita Kumari

AI Product Manager | Building AI-Native & GenAI Products | B2B SaaS | | Galaxeye Space | IBM | IIM Kozhikode

Bengaluru, Karnataka, India

Summary

Built AI-native products that sit at the intersection of enterprise complexity and user simplicity.

Most recently at GalaxEye, I led product for B2B SaaS and space-tech platforms — owning roadmap, cross-functional execution, and go-to-market across technical and non-technical stakeholders. Before that, at IBM, I worked on large-scale enterprise products where alignment across engineering, design, and business was the job.

My current focus is GenAI and AI agent products — specifically how teams instrument, ship, and measure agents in production. I've been deep in agent publishing pipelines, developer experience metrics, and what good looks like for GenAI co-pilot adoption at scale.

IIM Kozhikode | Open to PM / Lead PM roles in AI, SaaS, and Enterprise

Experience

GalaxEye

Product Manager

September 2024 - Present (2 years 2 months)

Bengaluru, Karnataka, India

IBM

2 years 2 months

Associate Product Manager

September 2022 - October 2023 (1 year 2 months)

Bangalore Urban, Karnataka, India

Associate Product Manager & CSM

September 2021 - September 2022 (1 year 1 month)

Bangalore Urban, Karnataka, India

As an Associate Product Manager, I focus on fostering collaboration, transparency, and accountability across cross-functional teams.

During my time at IBM, I successfully led agile product enhancements that improved process efficiency by 25% and reduced turnaround time by 35%. With hands-on experience in sprint planning, backlog grooming, and iteration delivery, I ensure that every release aligns with both user needs and business impact. My goal is to create an environment where teams work with clarity, communicate openly, and continuously improve—transforming agile principles into measurable outcomes and sustainable product growth.
